Mohamed Dhia Ben Amar

Full-Stack Software Engineer | Angular, Nx, TypeScript, Node.js, React

Email: contact@mohameddhia.dev | Phone: +216 53 184 439 | Location: Tunis, Tunisia (open to EU remote/hybrid)
Website: mohameddhia.dev | GitHub: github.com/mohamed-dhia-ben-amar | LinkedIn: linkedin.com/in/mohameddhia-benamar

Profile

Full-stack software engineer with 2 years of experience building Angular applications in Nx monorepos, with hands-on React, Node.js/Express, Golang and MongoDB experience. Built 21 of the 81 configurable widgets in a team library powering a CMS page builder, backed by ~9,000 unit tests (80%+ coverage), supervised an Angular/Nx migration and, as technical lead, helped standardize AI-assisted development (Claude Code agents, Playwright), cutting widget delivery to 4 days.

Experience

Frontend Developer • Minotore (Market Finance) *Tunis, Hybrid | Dec 2024 – Present*

- Built 21 of the 81 accessible (a11y) Angular widgets (product, content, document, search) in the team library used across 8 projects; webmasters configure them in the CMS page editor via JSON-schema-generated forms
- Helped migrate the widget config contract from XML to JSON; cut widget size 30–50% (shared helpers, leaner ECharts/ExcelJS)
- Supervised the migration of 68 widgets and 8 shared libraries from Angular 18 to Angular 21 / Nx 22 in one 3-week sprint, leading 3 developers: lighter widgets, cleaner code, better security; contributed to the Angular 22 / Nx 23 migration
- Led the adoption of Vitest across all 81 widgets and 8 libraries, now ~9,000 tests with 80–96% coverage
- **Technical Lead, NOVA project:** helped standardize the dev-workflow AI agent (Claude Code) used by ~30 developers across 4 teams and integrated Playwright so agents test widgets against real data in a headless browser; cut widget delivery from 1–2 weeks to 4 business days max and helped the team ship 60% more features per 3-week sprint
- Built a Storybook skeleton library to improve state handling and UI/UX across widgets, plus Keycloak auth screens
- Shipped widgets via GitLab CI and Jenkins, reporting issues to the DevOps team; ran Bearer/Trivy scans via Docker
- Mentored 2 new team members and 1 intern; ran manual and AI-assisted code reviews in Agile sprints (Jira, Figma)
- *Technologies:* Angular, Nx, TypeScript, RxJS, Signals, ECharts, Highcharts, ExcelJS, Storybook, Vitest, Playwright, Keycloak, GitLab CI, Jenkins, Docker, Claude Code

Full-Stack Engineer Intern • Converty (E-Commerce) *Tunis, Hybrid | Feb 2024 – Aug 2024*

- Co-developed, with one other developer, the merchant store-management mobile app (React Native, Expo, Redux, Zustand) published on the App Store and Google Play (now 10k+ downloads, rated 4.4/5); built its statistics and profile screens, working with a designer and a PM
- Reduced dashboard load time by 30% through lazy loading, route-level code splitting and modular architecture
- Implemented upsell/cross-sell automation flows on web and mobile, increasing average order value by 15%
- Built REST APIs with Node.js/Express and a Golang microservice for order processing
- *Technologies:* React, React Native, Expo, Redux, Zustand, Node.js, Express, MongoDB, Golang

Software Engineer Intern • IBSpace (E-Solutions) *Tunis, Hybrid | Jul 2023 – Sep 2023*

- Designed scalable Firebase Firestore schemas optimized for 10,000+ concurrent users with efficient query patterns
- Built real-time admin and analytics dashboards in Angular, saving operations teams ~6 hours per week of manual reporting
- *Technologies:* Angular, TypeScript, Firebase, Git

Front-End Mobile Developer Intern • Inoteqia (Deeptech & Cybersecurity) *Tunis, Hybrid | Aug 2022 – Sep 2022*

- Built the Flutter front end of a decentralized vehicle-trading DApp (Solidity, ERC-20, MetaMask), deployed to testnet

Education

Engineering Degree in Full-Stack Software Engineering (Mobile Dev. Specialization) • ESPRIT *2019 – 2024*

Leadership & Community

Google Developer Student Clubs (GDSC) • ESPRIT *Sep 2022 – Dec 2024*

- **Development Department Lead** (Sep 2023 – Jan 2024), then Mentor (Sep – Dec 2024): organized a hands-on Node.js, Express and MongoDB workshop
- **Blockchain Department Lead** (Sep 2022 – Jul 2023): led preparation of the on-site hackathon "Hack 22 Escape" with GDSC Budapest; organized the "Let's Talk Blockchain" workshop; speaker at the online event "Do All Blockchainers Think Alike"

Technical Skills

Frontend: Angular, Nx, RxJS, Signals, React, React Native, Flutter, HTML5, CSS3/SCSS, Angular Material, Storybook
State Management: NgRx, Redux, Zustand + Immer, Provider, GetX
Data Visualization & Export: ECharts, Highcharts, ExcelJS
Backend & Databases: Node.js, Express, Golang, REST APIs, Keycloak, MongoDB, Firebase Firestore
Programming Languages: TypeScript, JavaScript, Dart, Solidity
Testing: Vitest, Jest, Jasmine, Karma, Playwright, Karate
DevOps & Security: GitLab CI, Jenkins, Docker, Bearer, Trivy, Git, CI/CD
AI & Tools: Claude Code, AI Agents, GitHub Copilot, Jira, Figma
Also familiar with (academic/personal projects): Java, Spring Boot, Symfony, Python, GraphQL, MySQL

Languages

Arabic (Native) • English (Fluent) • French (C1, TCF 2026) • Japanese (Elementary)
